©Introduction

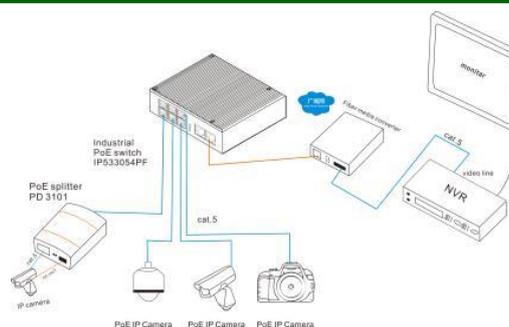

ODOT-ES326FS series network management industrial Ethernet switches, products comply with FCC, CE, ROHS standards. Supports 2 100Mbps optical ports and 6 100Mbps ethernet ports to support the Ethernet Layer 2 protocol required by the industrial site to ensure the stability of the communication network. The switches adopt low-power, fan-less design to ensure noise-free interference. At the same time, it supports -40~85° C working temperature and good EMC electromagnetic compatibility, ensuring stable operation in harsh industrial environment, and establishing fast and stable network terminal for industrial applications such as factory automation, intelligent transportation and video surveillance.
